About G Systems

Your trusted technology partner from India to the world

G Systems is an **ISO 9001:2015 certified IT consulting and software development company** headquartered in Greater Noida, India — in the heart of the Delhi-NCR technology corridor. Founded in **2011**, we specialise in **cloud computing, artificial intelligence, and big data** solutions that help startups, SMEs, and enterprises modernise, scale, and compete globally.

We are the partner of choice for organisations that want senior engineering leadership without enterprise overheads. From cloud migration and SaaS product builds to AI agents and fractional CTO engagements, G Systems combines deep technical expertise with a product mindset — taking clients from idea to launch, and from launch to scale.

Why Global Clients Choose G Systems

Certified Quality

ISO 9001:2015 certified processes and AWS-certified cloud professionals ensure predictable, audit-ready delivery.

Global Time-Zone Fit

Structured overlap with Singapore, European, and US business hours — daily stand-ups, weekly demos, and transparent reporting.

Cost Advantage

Senior India-based engineering talent delivers 40-60% cost savings versus onshore teams, without compromising quality.

Product Mindset

We think beyond code — roadmaps, user experience, unit economics, and go-to-market are part of every engagement.

Security & Compliance

Architectures designed for GDPR, data-residency, and industry compliance from day one — critical for EU and US clients.

End-to-End Ownership

One accountable partner from discovery and architecture to development, testing, deployment, and 24x7 support.

TRUSTED BY

Ministry of MSME (Govt. of India) • Sharda Launchpad • GL Bajaj (GLBCRI) • Amarpushp Skill Academy
Motherhood Foundation • KARM & Associates • Apratim • Healthcare & Education institutions

Our Niche Services

Six specialised offerings for international businesses

01 Cloud Application Development

Secure, scalable, high-performance applications built cloud-native on AWS. We handle cloud assessment and strategy, AWS migration planning and execution, application and data modernisation, and ongoing cloud management with cost optimisation — with minimal downtime and business continuity assured.

02 Product Management

We turn ideas into successful digital products. From market discovery, roadmapping, and PRDs to launch and scaling, our product managers ensure what you build meets real market needs, hits business KPIs, and delivers measurable value at every release.

03 SaaS Software Development

Multi-tenant SaaS platforms engineered for growth — subscription billing, role-based access, analytics, and seamless user experience. Built on modern serverless and microservices architectures (AWS Lambda, Java/Spring Boot, Terraform IaC) for reliability and low operating cost.

04 AI Agent Creation

Custom AI agents and assistants that automate support, sales, and internal workflows. We design, train, and deploy conversational AI integrated with your website, WhatsApp, and business systems — including domain-specific assistants for education, agriculture, and services businesses.

05 CTO as a Service

Fractional technology leadership for startups and SMEs. Get a seasoned CTO to own your architecture, technology roadmap, vendor decisions, team building, and investor-ready technical due diligence — at a fraction of the cost of a full-time hire.

06 Application Maintenance & Support

Keep your applications secure, fast, and always available. Proactive monitoring, performance optimisation, security patching, feature enhancements, and 24x7 support with defined SLAs — so your team can focus on the business, not the backend.

Leadership & Contact

Meet the founder — and let's start the conversation

Ashish Kushwaha

Founder, G Systems

[linkedin.com/in/ashish-kushwaha-9057b336](https://www.linkedin.com/in/ashish-kushwaha-9057b336)

Ashish brings **20+ years of IT industry experience** spanning enterprise software, cloud architecture, and digital products. An **AWS Certified** professional and an alumnus of **IIM Udaipur**, he combines deep engineering expertise with business and management acumen. His experience covers solution architecture for microservices and cloud resilience, GDPR-compliant system design, SaaS unit economics, and AI-driven product development.

Under his leadership, G Systems has delivered cloud migrations, SaaS platforms, AI assistants, and digital transformation programmes for government bodies, universities, NGOs, and businesses — and is now extending this proven delivery capability to clients across **Singapore, Europe, and the USA**. Every international engagement receives Ashish's direct architectural oversight.

Flexible Engagement Models

Dedicated Team

Your own offshore engineering pod, managed end-to-end.

Fixed-Scope Projects

Defined deliverables, timelines, and budgets.

Retainer / Fractional

Monthly CTO, AI, or support retainers that scale with you.
